

Bright Local School District

Teacher Technology Grant Program

The Bright Local School District would like to support and encourage the use of technology among teachers and students to further district goals, enhance the educational experience for our students, and better prepare them for life in the 21st century.

To this end, the district is making funds available for teacher-initiated technology projects that integrate technology into the educational processes of teaching and learning by helping to meet the following goals:

- Support the teaching and learning of Ohio's Technology Academic Content Standards
- Promote the acquisition of 21st century skills among our students. These skills include:
 - An improved knowledge of global cultures and societies.
 - Critical thinking, problem solving skills and the ability to innovate.
 - Information literacy, including finding, filtering, evaluating, synthesizing and drawing conclusions from information.
 - The ability to work with others as a team.
- Increase access to technology for students at school.
- Enhance teaching and instruction with technology.

Teacher Technology Application

2020

This form should be completed and submitted to Luke Stevenson.

General Information

Project Title: _____

Primary Applicant: _____

Co-Applicant: _____

Project Location: _____

Affected Students: _____ Number: _____

Project Summary:

Goals & Objectives

Please list the goals of this project:

Which Technology Academic Content Standards are met by your project?

How will this project improve students' 21st century skills?

Project Plan

Please describe the project:

Budget

Please indicate the quantity and descriptions of items required.

Quantity	Description

Project Evaluation

Please describe how you will measure the success of your project in meeting the goals outlined. _____
