

# Water Cycle

Name \_\_\_\_\_

water	begins	water vapor
heavy	drops	evaporates
bump	rain	clouds

**Fill in the blanks below using the words from the word bank**

The water cycle is interesting. The water cycle begins with \_\_\_\_\_ from puddles or oceans. Then the water \_\_\_\_\_ and forms \_\_\_\_\_.

Then tiny \_\_\_\_\_ of water form. This will cause \_\_\_\_\_ to form in the sky.

When the droplets begin to \_\_\_\_\_ together in the sky and get too \_\_\_\_\_, they fall from the clouds as drops of \_\_\_\_\_. Then the water cycle \_\_\_\_\_ again.
